

Reel for Jack-Up vessel

Offshore Jackup Vessels

Hose & Reel Products BV is an European company specialising in custom made Reel solutions for all kinds of industrial purposes, delivering solutions for more than 10 years. Among several customisations, one of the major customizations relevant for the Offshore Industry is a special Reel to enable constant supply of sea-water on-board the vessels. Offshore Jackup vessels are required for maintenance and installation of Offshore Wind Farms and Oil & Gas fields, and such vessels need a constant flow of sea-water to cool it's engines. To manage a constant flow of sea-water when the vessel is lifted up or down can be challenging and can lead to major engine down-time. HRP has designed the perfect solution for such situations by manufacturing a sea-worthy Reel system that allows variable pressure reel movement to match the vessel's movements. This reel-system can be further customised for any medium (oil, gas, water) and to meet the particular requirements of the vessel.

Whatever your need, we have a solution:

- The complete package, not only the Reel but also all additional ancillary equipment that the client needs, like hoses, pumps with complete integration and programming.
- No limitations in reel and hose sizes.
- All cables and hoses bound together on one Reel to increase efficiency and safety, and securing the bending radius.
- Safer environment on-board the vessel conforming to European and Worldwide regulations concerning the storage of hoses and cables.
- Can be powered in every way depending on what is available on-board.
- Can be Manual or fully automated and independent system.
- Can be used in every environment and situation.
- Life of hose is greatly increased when bound to the right Reel.

As specialists in custom-made Reels, our aim is to provide you the most effective solution for your requirement of reels and hoses, whatever the medium (oil, gas, water), adding our experience and expertise with it. We strive to build the Reels to last a lifetime even for use in an offshore environment. Hose & Reel Products BV can deliver any kind of custom made seaworthy Reels, especially for the offshore industry. If you have further questions, please contact us.
