

# Mining and Tunneling Reels

*Hose & Reel Products BV is the leading European designer and manufacturer of tailor-made, high-quality hose and cable reels, delivering of and custom-made reels for the Mining and Tunnelling industries for the last fifteen years.*

*Hose & Reel Products can provide its customers with the convenience of a simple reel with the applications of a fully customized reel, specifically tailored to their requirements. Our reel systems for underground mining and tunnelling are designed in accordance with the highest European and worldwide safety regulations.*

## Solutions for customised mining and tunnelling Reel

The strength of Hose & Reel Products lies in its engineering and manufacturing capabilities, which allows for customized solutions for clients' specific needs. The quality management system is closely

integrated between our design department, the manufacturing process and the client. This enables a full understanding of a client's particular requirements, and the designing of the perfect solution, which will be easy to assemble onsite.

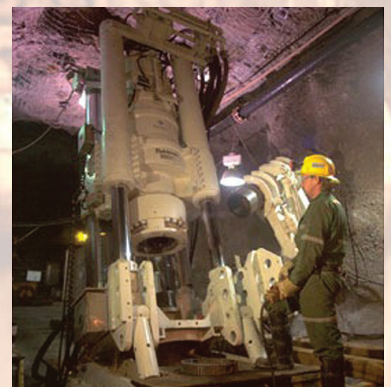

Our experience in numerous different mines, such as coal, copper and iron and mines, is enormous and we believe that we will always find a solution for our clients' needs. Our design and manufacturing process gives us the ability to design a reel to any size that a machine requires. Applications such stackers, drilling equipment, self loading, scaling machines and roof bolting unites is for Hose Reel Products a daily work to develop a range of special mining or tunnelling reels for the power supply of these machines.

## Safe, reliable Reel systems for underground mining and tunnelling

Whatever you require, Hose & Reel has a solution. We provide hose and cable reels systems that are suitable for both hazardous and underground applications, in accordance with the highest European and worldwide safety regulations. All parts of our reels are also made ATEX proof, which reduces the chance of explosions.

We can offer and secure:

- Custom-made reels, engineered to meet your wishes.
- The complete package: reel, hose, controls and everything the client requires.
- Fast delivery time.
- Powered by: air, hydraulic, electric or manual.
- Meet the highest international standards.

## Flexible Reel options

We offer a very large range of options in order to provide the most flexible Reel solutions. This includes any Reel dimension, which makes Hose & Reel's solutions ideal for small working areas. We also provide Reels in any material grade, including steel and stainless steel 304 and 316, and can use any paint or coating as required. Our Reels, which can be powered in any way available in a mine, can be used for a very large range of applications.
