

Reels for Fuelling

Reels for Fuelling

Hose & Reel Products BV is the leading European designer and manufacturer of tailor made, high quality refuelling reels for the offshore and inland market. The strength of Hose & Reel Products BV is that all our engineering and building facility's are made for special design applications. The quality management system is very close attached between customer, design department and manufacturing process, therefore we can provide an easy assembly system for the reel. Our range of fuel reels is enormous and we believe that we will always find a solution for the client's problem.

What is (re)fuelling?

Refuelling is a fast way to transport fuel from one point to another point. Refuelling is a easy way for offshore facilities, inland vessels or other occasions for supplying liquids or in order to take liquids.

Whatever your need, we have the solution:

- All kind of dimensions are possible, also for larger diameter hoses and long lengths for offshore refuelling.
- Can be powered in every way depending on what is provided or available.
- Our reels can be used for any kind of fuel, but also for other mediums like potable water or waste water.
- Available materials: Steel, Stainless Steel, Plastic, and Aluminium.
- The reels meet the highest European and Worldwide safety regulations.
- All parts of the reel can be ATEX proof. This reduces the chance of explosions.
- Every kind of paint and coatings can be applied.
- Stainless Steel 2", 30 meter, reel with 24V ATEX proof electric motor on stock for quick delivery.
- We can deliver the complete package: Hoses, Couplings, refuelling guns, flow meters, etc.
- Manufactured it for easy install.

What is the advantage of reels instead of other methods

- User friendly;
- Compact (small footprint);
- Saving time (unrolling and rolling);
- High lifetime;
- No more danger of unstored loose hoses on the workplace after the refuelling.
